Title V Operating Permit Program

- The Tribe's Title V operating permit program received the EPA's 2016 Clean Air Act Excellence Award for Regulatory Policy Innovations.
- First tribe to receive full delegation of the Title V operating permit program.
- Currently 36 permitted Title V sources operating on the Reservation. Sources consist of natural gas compressor stations, treating plants, processing plants, and a municipal solid waste landfill.
- Each source is inspected once every two-years, as required by the Tribe's EPA approved Compliance Monitoring Strategy.
- Non-compliance is addressed according to the protocols and enforcement pathways outlined in the Tribe's Enforcement Procedures and Penalty Policy.

Southern Ute Indian Tribe Air Quality Team

2015 Comprehensive Emission Inventory

- The Air Quality Program is developing a comprehensive emission inventory for 2015.
- The inventory includes:
 - Permitted, Registered and Non-Registered Oil and Gas Sources.
 - Non-Oil and Gas Operations: Wildfires, Mobile Sources, Biogenic, Residential Heating etc.
- A final 2015 emission inventory summary will be available mid-2017.

Air Monitoring Program

- The Air Quality Program operates two air monitoring stations, Ute 1 and Ute 3.
- A new mobile monitoring station is currently collocated with Ute 3 for data validation and calibration.
- The stations monitor and record: ozone, PM10 and PM2.5, nitrogen oxides, carbon monoxide, visibility and meteorological conditions.
- Real time information reported to the Air Monitoring website:
<http://www.southernute.nsn.gov/environmental-programs/air-quality/ambient-monitoring/>

Ute 3 Monitoring Station, located near Bondad Hill, records ozone, nitrogen dioxide, PM10 and PM 2.5, and meteorological conditions
