Subject: [EXT] OAI Updates-Draft Rule, Modeling, & Website Redesign

Hi Liz,

I wasn't sure who to reach out to on this but I was reading through the OAI rule and saw an exemption for engines and turbines *"Existing sources that were subject to federal standards of performance under 40 CFR Part 60 and Part 63 between March 25, 2004 and January 1, 2009 are exempt from the requirements of [20.2.50.13 NMAC](#)."*

I believe this refers to existing sources, i.e. existing for 20.2.50 NMAC purposes when it is finalized and that the exemption could apply for sources subject to NSPS and MACT rule when that rule was promulgated during this time (2005- 2009) but the wording is a little unclear to me. Can you confirm if I am interpreting this correctly? Also is the intent of the rule to be subject to both NSPS and MACT?

Thank you for your help. I appreciate it.

20.2.50.13 STANDARDS FOR ENGINES AND TURBINES

A. Applicability

- (1) New and existing portable and stationary natural gas-fired spark compression ignition engines, and natural gas-fired combustion wellheads, tank batteries, gathering and boosting sites, natural gas plants, and transmission compressor stations are subject to 20.2.50.13 NMAC.
- (2) Existing sources that were subject to federal standards of performance under 40 CFR Part 60 and Part 63 between March 25, 2004 and January 1, 2009 are exempt from the requirements of 20.2.50.13 NMAC.

Regards,

Adam Erenstein

Ozone Attainment Initiative Bulletin

Having trouble viewing this email? [View it as a Web page.](#)

The New Mexico Environment Department (NMED) released a draft version of the state's ozone precursor rule for an informal 30-day public comment period. NMED's draft rules focus on oil and natural gas equipment that emit volatile organic compounds (VOCs) and oxides of nitrogen (NO_x).

The public comment period for the draft rule provides the public an early opportunity to participate in the regulatory process and rule development. Once NMED receives and considers public input, it will revise the rule and request a public hearing before the Environmental Improvement Board. NMED anticipates requesting a December rule making hearing in September. A second formal public comment period and opportunity to participate in the process will be available at that time.

NMED's draft rule is available [here](#). Please provide input on the draft rule to nm.methanestrategy@state.nm.us or to Liz Bisbey-Kuehn, NMED Air Quality Bureau, 525 Camino de los Marquez, Suite 1, Santa Fe, NM 87505, by 5 p.m. on August 20, 2020.

NMED will host a virtual public meeting on the rule from 4-6 p.m. on August 6, 2020. Additional details are forthcoming.

In addition, information on statewide ozone photochemical modeling to support regulatory development is available to the public at <https://www.wrapair2.org/NMOAI.aspx>. NMED is also redesigning its ozone webpage to update the information provided, including links to our rulemaking efforts and make it more user friendly. NMED's redesigned ozone webpage will be available shortly at <https://www.env.nm.gov/air-quality/ozone/>.

For additional information concerning this bulletin, please contact Robert Spillers at robert.spillers@state.nm.us or (505) 476-4324.
