N.M. Water Quality Control Commission co Pam Castaneda Santa Fe, NM 87501

To co Pam Castaneda,

I urge the Water Quality Control Commission to reject the New Mexico Environment Department's proposed copper-mining rule now under consideration.

New Mexico Environment Department's proposed rule violates the state Water Quality Act, which requires companies to prevent groundwater contamination during their operations.

Environment Department managers ignored the recommendations of their own technical staff and the Advisory Committee for this proposal; instead they adopted the copper-mining industry's requests to allow contamination.

Our water and groundwater is irreplaceable in this time of drought.
Once water is polluted by mine wastes, it is no longer available as a water source.

The Water Quality Control Commission is required to adopt regulations "to prevent or abate water pollution in the state."

Please heed your important responsibility to protect New Mexicans' water by remanding this proposal back to the Environment Department and requiring it to produce a set of rules that protects New Mexicans and our water, not just the business interests of the copper-mining corporations.

Thank you for your consideration.

Sincerely,

Barry Hatfield

N.M. Water Quality Control Commission co Pam Castaneda Santa Fe, NM 87501

To co Pam Castaneda,

I urge the Water Quality Control Commission to reject the New Mexico Environment Department's proposed copper-mining rule now under consideration.

New Mexico Environment Department's proposed rule violates the state Water Quality Act, which requires companies to prevent groundwater contamination during their operations.

Environment Department managers ignored the recommendations of their own technical staff and the Advisory Committee for this proposal; instead they adopted the copper-mining industry's requests to allow contamination.

Our water and groundwater is irreplaceable in this time of drought.
Once water is polluted by mine wastes, it is no longer available as a water source.

The Water Quality Control Commission is required to adopt regulations "to prevent or abate water pollution in the state."

Please heed your important responsibility to protect New Mexicans' water by remanding this proposal back to the Environment Department and requiring it to produce a set of rules that protects New Mexicans and our water, not just the business interests of the copper-mining corporations.

Thank you for your consideration.

Sincerely,

Frances Jessop

Apr 26, 2013

N.M. Water Quality Control Commission co Pam Castaneda Santa Fe, NM 87501

To co Pam Castaneda,

Water is life. Clean water is essential for the health of the people, animals and plants of New Mexico, I respectfully request the Water Quality Control Commission to reject the New Mexico Environment Department's proposed copper-mining rule now being considered.

This proposed rule by the New Mexico Environment Department violates the state Water Quality Act that requires companies to prevent groundwater contamination during operations.

The recommendations of the technical staff and the Advisory Committee on this proposal were ignored by the Environment Department managers who instead adopted the copper-mining industry's requests to allow contamination.

Our water and groundwater is irreplaceable and finite. New Mexico's water is even more precious in this time of drought. Once water is polluted by mine wastes, it is no longer available as a water source.

The Water Quality Control Commission is required by law to adopt regulations "to prevent or abate water pollution in the state."

Please take your important responsibility to protect New Mexicans' water by remanding this proposal back to the Environment Department and requiring it to produce a set of rules that protects New Mexicans and our water, not just the business interests of the copper-mining corporations. Thank you for realizing that water must be protected for all New Mexicans. 3 Many lives depend upon you making the right decision..

N.M. Water Quality Control Commission co Pam Castaneda Santa Fe, NM 87501

To co Pam Castaneda,

I urge the Water Quality Control Commission to reject the New Mexico Environment Department's proposed copper-mining rule now under consideration.

New Mexico Environment Department's proposed rule violates the state Water Quality Act, which requires companies to prevent groundwater contamination during their operations.

Environment Department managers ignored the recommendations of their own technical staff and the Advisory Committee for this proposal; instead they adopted the copper-mining industry's requests to allow contamination.

Our water and groundwater is irreplaceable in this time of drought.
Once water is polluted by mine wastes, it is no longer available as a water source.

The Water Quality Control Commission is required to adopt regulations "to prevent or abate water pollution in the state."

Please heed your important responsibility to protect New Mexicans' water by remanding this proposal back to the Environment Department and requiring it to produce a set of rules that protects New Mexicans and our water, not just the business interests of the copper-mining corporations.

Thank you for your consideration.

Sincerely,

Judy Whitney

N.M. Water Quality Control Commission co Pam Castaneda Santa Fe, NM 87501

To co Pam Castaneda,

I BELIEVE 'CONTAMINATION' IS REALLY ALL THAT NEEDS TO BE UNDERSTOOD HERE, BUT I'M NOT REALLY EXPECTING ANY DEPTH OF WISDOM FROM POLITICIANS ANYMORE. YOU WILL UNDERSTAND THE ERROR OF YOUR WAYS WHEN YOU CAN'T GET A CLEAN DRINK OF WATER ANYMORE. TOO BAD SO MANY OTHERS WILL HAVE TO SUFFER FIRST, BUT I KNOW YOU DON'T GIVE A DAMN ABOUT THAT.

I urge the Water Quality Control Commission to reject the New Mexico Environment Department's proposed copper-mining rule now under consideration.

New Mexico Environment Department's proposed rule violates the state Water Quality Act, which requires companies to prevent groundwater contamination during their operations.

Subject: Public comment on Water Quality Rules for Copper Mining WQCC 12-01 (R)

Apr 26, 2013

N.M. Water Quality Control Commission co Pam Castaneda Santa Fe, NM 87501

To co Pam Castaneda,

I urge the Water Quality Control Commission to reject the New Mexico Environment Department's proposed copper-mining rule now under consideration.

New Mexico Environment Department's proposed rule violates the state Water Quality Act, which requires companies to prevent groundwater contamination during their operations.

Environment Department managers ignored the recommendations of their own technical staff and the Advisory Committee for this proposal; instead they adopted the copper-mining industry's requests to allow contamination.

Our water and groundwater is irreplaceable in this time of drought.
Once water is polluted by mine wastes, it is no longer available as a water source.

The Water Quality Control Commission is required to adopt regulations "to prevent or abate water pollution in the state."

Please heed your important responsibility to protect New Mexicans' water by remanding this proposal back to the Environment Department and requiring it to produce a set of rules that protects New Mexicans and our water, not just the business interests of the copper-mining corporations.

Thank you for your consideration.

Sincerely,

wendy gerstein
