Apr 27, 2013

N.M. Water Quality Control Commission co Pam Castaneda Santa Fe, NM 87501

To co Pam Castaneda,

I urge the Water Quality Control Commission to reject the New Mexico Environment Department's proposed copper-mining rule now under consideration.

New Mexico Environment Department's proposed rule violates the state Water Quality Act, which requires companies to prevent groundwater contamination during their operations.

Environment Department managers ignored the recommendations of their own technical staff and the Advisory Committee for this proposal; instead they adopted the copper-mining industry's requests to allow contamination.

Our water and groundwater is irreplaceable in this time of drought.

Once water is polluted by mine wastes, it is no longer available as a water source.

**WATER IS A MUCH MORE VALUABLE RESOURCE THAN COPPER BECAUSE WE MUST USE IT FOR PEOPLE NEEDS, FOR FARMING AND OUR SUPPLY OF CLEAN WATER IS DIMINISHING RAPIDLY.**

**IF YOOU DON'T REJECT THIS RULE YOUR BUDGET SHOULD BE CUT AND MANY OF US WILL WORK TO THAT END.**

The Water Quality Control Commission is required to adopt regulations "to prevent or abate water pollution in the state."

Please heed your important responsibility to protect New Mexicans' water by remanding this proposal back to the Environment Department and requiring it to produce a set of rules that protects New Mexicans and our water, not just the business interests of the copper-mining corporations.

Thank you for your consideration.

Sincerely,

Max & Catherine Coll  
83 La Barberia Trl

Apr 27, 2013

N.M. Water Quality Control Commission co Pam Castaneda Santa Fe, NM 87501

To co Pam Castaneda,

I am writing to express my deep concern over the proposed WQCC rules for copper mining. I urge the Water Quality Control Commission to reject the New Mexico Environment Department's proposed copper-mining rule now under consideration.

New Mexico Environment Department's proposed rule violates the state Water Quality Act, which requires companies to prevent groundwater contamination during their operations.

Environment Department managers ignored the recommendations of their own technical staff and the Advisory Committee for this proposal; instead they adopted the copper-mining industry's requests to allow contamination.

Our water and groundwater is irreplaceable in this time of drought.  
Once water is polluted by mine wastes, it is no longer available as a water source.

The Water Quality Control Commission is required to adopt regulations "to prevent or abate water pollution in the state."

Please heed your important responsibility to protect New Mexicans' water by remanding this proposal back to the Environment Department and requiring it to produce a set of rules that protects New Mexicans and our water, not just the business interests of the copper-mining corporations.

Thank you for your consideration.

Sincerely,

Toni Carrell  
39 Condesa Rd  
Santa Fe, NM 87508-8136

Apr 27, 2013

N.M. Water Quality Control Commission co Pam Castaneda Santa Fe, NM 87501

To co Pam Castaneda,

I am revolted that the Mining Act of 1872 still gives mining companies the right to exploit natural resources with minimal concern for our environment and shared resources. This is no longer the wild west but mining companies and the government agencies they pay off to represent their interests, act as if it is.

I urge the Water Quality Control Commission to reject the New Mexico Environment Department's proposed copper-mining rule now under consideration.

New Mexico Environment Department's proposed rule violates the state Water Quality Act, which requires companies to prevent groundwater contamination during their operations.

Environment Department managers ignored the recommendations of their own technical staff and the Advisory Committee for this proposal; instead they adopted the copper-mining industry's requests to allow contamination.

N.M. Water Quality Control Commission co Pam Castaneda Santa Fe, NM 87501

To co Pam Castaneda,

I urge the Water Quality Control Commission to reject the New Mexico Environment Department's proposed copper-mining rule now under consideration.

New Mexico Environment Department's proposed rule violates the state Water Quality Act, which requires companies to prevent groundwater contamination during their operations.

Environment Department managers ignored the recommendations of their own technical staff and the Advisory Committee for this proposal; instead they adopted the copper-mining industry's requests to allow contamination.

Our water and groundwater is irreplaceable in this time of drought.  
Once water is polluted by mine wastes, it is no longer available as a water source.

The Water Quality Control Commission is required to adopt regulations "to prevent or abate water pollution in the state."

Please heed your important responsibility to protect New Mexicans' water by remanding this proposal back to the Environment Department and requiring it to produce a set of rules that protects New Mexicans and our water, not just the business interests of the copper-mining corporations.

Thank you for your consideration.

N.M. Water Quality Control Commission co Pam Castaneda Santa Fe, NM 87501

To co Pam Castaneda,

I write to you as a planning commissioner serving the City of Santa Fe, and as a member of the board of the American Planning Association, New Mexico Chapter. I am also an environmental planner with 30 years of experience and two masters degrees from UNM-ABQ.

I urge the Water Quality Control Commission to reject the New Mexico Environment Department's proposed copper-mining rule now under consideration. There must be equal application of our environmental laws for all industries that benefit from the extraction of our natural resources.

New Mexico Environment Department's proposed rule violates the state Water Quality Act, which requires companies to prevent groundwater contamination during their operations. I would also ask that NMED consider potential environmental justice impacts to minority and low-income populations that may be affected by this action. The later is subject to review as a violation of the Civil Rights Act.

Environment Department managers ignored the recommendations of their own technical staff and the Advisory Committee for this proposal; instead they adopted the copper-mining industry's requests to allow contamination.

Our water and groundwater is irreplaceable in this time of drought.

Once water is polluted by mine wastes, it is no longer available as a water source.

The Water Quality Control Commission is required to adopt regulations "to prevent or abate water pollution in the state."

Please heed your important responsibility to protect New Mexicans' water by remanding this proposal back to the Environment Department and requiring it to produce a set of rules that protects New Mexicans and our water, not just the business interests of the copper-mining corporations.

Thank you for your consideration.

Sincerely,

Alexandra Siek

Apr 27, 2013

N.M. Water Quality Control Commission co Pam Castaneda Santa Fe, NM 87501

To co Pam Castaneda,

I urge the Water Quality Control Commission to reject the New Mexico Environment Department's proposed copper-mining rule now under consideration.

New Mexico Environment Department's proposed rule violates the state Water Quality Act, which requires companies to prevent groundwater contamination during their operations.

Environment Department managers ignored the recommendations of their own technical staff and the Advisory Committee for this proposal; instead they adopted the copper-mining industry's requests to allow contamination.

Our water and groundwater is irreplaceable in this time of drought.  
Once water is polluted by mine wastes, it is no longer available as a water source.

The Water Quality Control Commission is required to adopt regulations "to prevent or abate water pollution in the state."

Please heed your important responsibility to protect New Mexicans' water by remanding this proposal back to the Environment Department and requiring it to produce a set of rules that protects New Mexicans and our water, not just the business interests of the copper-mining corporations.

Thank you for your consideration.

Sincerely,
