N.M. Water Quality Control Commission co Pam Castaneda Santa Fe, NM 87501

To co Pam Castaneda,

I urge the Water Quality Control Commission to reject the New Mexico Environment Department's proposed copper-mining rule now under consideration.

New Mexico Environment Department's proposed rule violates the state Water Quality Act, which requires companies to prevent groundwater contamination during their operations.

Environment Department managers ignored the recommendations of their own technical staff and the Advisory Committee for this proposal; instead they adopted the copper-mining industry's requests to allow contamination.

Our water and groundwater is irreplaceable in this time of drought.

The Water Quality Control Commission is required to adopt regulations "to prevent or abate water pollution in the state."

Please heed your important responsibility to protect New Mexicans' water by remanding this proposal back to the Environment Department and requiring it to produce a set of rules that protects New Mexicans and our water, not just the business interests of the copper-mining corporations.

Thank you for your consideration.

Sincerely,

Jason Clack

N.M. Water Quality Control Commission co Pam Castaneda Santa Fe, NM 87501

To co Pam Castaneda,

As a NM citizen, I urge the Water Quality Control Commission to reject the New Mexico Environment Department's proposed copper-mining rule now under consideration. There are 2 points to remember when making your decision:

#1: It violates the state Water Quality Act, which requires companies to prevent groundwater contamination during their operations.

#2: The Environment Department managers ignored the recommendations of their own technical staff and the Advisory Committee for this proposal.

For their own reasons, and against the advice of their own technical staff & the Advisory Committee, they adopted the copper-mining industry's requests to allow contamination. Why was a committee assigned to look into this if the decision--politically motivated, I'm sure--had already been made?

Our water and groundwater is irreplaceable--a fact brought to point in this time of drought. Your children & grandchildren will not be any more able to buy their way into fresh water than anyone else's. Once NM's water is contaminated, we really may have mutated aliens in NM--our own children & grandchildren. We sure won't attract tourists any more. Who would want to visit a place that may alter their genes forever--let alone move here?

The Water Quality Control Commission is required to adopt regulations "to prevent or abate water pollution in the state."

Please, step back long enough to remember that it is everyone's business (& your commission's assigned responsibility) to protect New Mexicans' water by remanding this proposal back to the Environment Department and requiring it to produce a set of rules that protects New Mexicans and our water, not just the business interests of the copper-mining corporations.

Thank you for your consideration.

Sincerely,

Christine Newtonson

N.M. Water Quality Control Commission co Pam Castaneda Santa Fe, NM 87501

To co Pam Castaneda,

I am beyond outraged that the Water Quality Control Commission is even for an instant considering endangering NM water, vital, precious, ever more scarce, by adopting the NM Environment Department's proposed copper-mining rule.

I insist that the Water Quality Control Commission reject the New Mexico Environment Department's proposed copper-mining rule.

New Mexico Environment Department's proposed rule violates the state Water Quality Act, which requires companies to prevent groundwater contamination during their operations.

Environment Department managers ignored the recommendations of their own technical staff and the Advisory Committee for this proposal; instead they are acting as contemptible puppets for the copper-mining industry's desire to be allowed to contaminate scarce water on which New Mexicans depend.

Our water and groundwater is irreplaceable in this time of drought.

The Water Quality Control Commission is required to adopt regulations "to prevent or abate water pollution in the state."

Please heed your important responsibility to protect New Mexicans' water by remanding this proposal back to the Environment Department and requiring it to produce a set of rules that protects New Mexicans and our water, not just the business interests of the copper-mining corporations. We can live without copper mining; we cannot live without water.

Thank you for your consideration.

Sincerely,

Joyce Westerbur

Our water and groundwater is irreplaceable in this time of drought.

The Water Quality Control Commission is required to adopt regulations "to prevent or abate water pollution in the state."

Please heed your important responsibility to protect New Mexicans' water by remanding this proposal back to the Environment Department and requiring it to produce a set of rules that protects New Mexicans and our water, not just the business interests of the copper-mining corporations.

Thank you for your consideration.

Sincerely,

Peggy Blackburn

Subject: Public comment on Water Quality Rules for Copper Mining WQCC 12-01 (R)

May 2, 2013

N.M. Water Quality Control Commission co Pam Castaneda Santa Fe, NM 87501

To co Pam Castaneda,

I urge the Water Quality Control Commission to reject the New Mexico Environment Department's proposed copper-mining rule now under consideration.

New Mexico Environment Department's proposed rule violates the state Water Quality Act, which requires companies to prevent groundwater contamination during their operations.

Environment Department managers ignored the recommendations of their own technical staff and the Advisory Committee for this proposal; instead they adopted the copper-mining industry's requests to allow contamination.

Our water and groundwater is irreplaceable in this time of drought.

The Water Quality Control Commission is required to adopt regulations "to prevent or abate water pollution in the state."

Please heed your important responsibility to protect New Mexicans' water by remanding this proposal back to the Environment Department and requiring it to produce a set of rules that protects New Mexicans and our water, not just the business interests of the copper-mining corporations.

Thank you for your consideration.

Sincerely,

Kate Inglis
