**Groundwater Monitoring at Sandia National Laboratories/New Mexico Mixed Waste Landfill Conducted by NMED DOE OB for FFY 2010 Q-4**

The New Mexico Environment Department (NMED) DOE Oversight Bureau (Bureau) has compiled and assessed groundwater data collected in July 2010. The Bureau collected groundwater samples from Mixed Waste Landfill (MWL) groundwater monitoring wells MWL-MW7, MWL-MW8 and MWL-MW9. Split samples were collected using standard Sandia National Laboratories/New Mexico (SNL/NM or Sandia) sampling procedures and equipment. Bureau samples were submitted to an independent contract laboratory to be analyzed for target compound list volatile organic compounds (VOCs). No anomalies were detected in the groundwater results from samples collected at MWL monitoring wells. No analyte concentrations were detected above the minimum detection level.

**Data Assessment**

Data results are compared to applicable Maximum Contaminant Levels (MCLs) from the EPA National Primary Drinking Water Regulations (40 CFR 141).

**Results**

Analytical results for target compound list volatile organic compounds are listed in Table 1. No analyte concentrations were detected above the minimum detection level.

**Conclusions**

Data results from Sandia compare well with NMED results. No anomalies were detected in the groundwater results from samples collected at MWL monitoring wells. No samples were detected above the minimum detection level.

**Response**

Questions or comments should be addressed to Chris Armijo by phone at (505) 383-2070, by e-mail at [chris.armijo1@state.nm.us](mailto:chris.armijo1@state.nm.us), or to the address in the letterhead.
