Deputy Secretary

**Groundwater Monitoring at Sandia National Laboratories/New Mexico Tijeras Arroyo  
Groundwater Conducted by NMED DOE OB for FFY 2011 Q-4**

The New Mexico Environment Department (NMED) DOE Oversight Bureau (Bureau) has compiled and assessed groundwater data collected during August and September 2011. The Bureau collected groundwater samples from Tijeras Arroyo Groundwater (TAG) monitoring wells TA1-W-02, TA2-SW1-320, TA2-W-01, TA2-W-19, TA2-W-27, TJA-2, TJA-4, TJA-6, TJA-7, and WYO-4. Split samples were collected using standard Sandia National Laboratories/New Mexico sampling procedures and equipment. The samples were submitted for analysis to an independent analytical laboratory for Target Analyte List (TAL) metals plus uranium, anions, nitrate, nitrite, gamma emitting isotopes, gross alpha and beta, and volatile organic compounds (VOCs). Several samples analyzed for nitrate were detected above the EPA MCL of 10 mg/L. Trichloroethylene (TCE) was also detected above the EPA MCL of 5 µg/L at monitoring well WYO-4.

**Data Assessment**

Data results are compared to applicable Maximum Contaminant Levels (MCLs) established by the U.S. Environmental Protection Agency (EPA) National Primary Drinking Water Regulations (40 CFR 141), National Primary Drinking Water Standards, EPA, July 2002.

**Results**

Analytical results for TAL metals are presented in Table-1. No metal parameters were detected above established regulatory standards.

Analytical results for inorganic compounds are listed in Table-2. Samples were analyzed for anions (bromide, chloride, fluoride and sulfate), nitrate and nitrite. Nitrate concentrations were detected above the EPA MCL of 10 mg/L at monitoring wells TA2-SW1-320 (21.1 mg/L), TJA-2 (10.1 mg/L), TJA-4 (28.4 mg/L) and TJA-7 (22.2 mg/L).

Analytical results for radionuclides are listed in Table-4. Samples were analyzed for gross alpha, gross beta and gamma emitting isotopes. No isotopes were detected above EPA MCLs.

Volatile organic compounds (VOCs) detected above the method detection limit are presented in Table-2. All samples were detected below established MCLs, except trichloroethylene (TCE). Monitoring well WYO-4 measured a TCE concentration of 6.5 µg/L.

Response

Questions or comments should be addressed to Chris Armijo by phone at (505) 383-2070, by e-mail at [chris.armijo1@state.nm.us](mailto:chris.armijo1@state.nm.us), or to the address in the letterhead.
